

Elabo provides an unusually wide range of tall and side cabinets for laboratories and offices. Using a multitude of different inserts such as shelves, drawers, hanging file systems etc. these products support optimum storage of devices and materials to guarantee quick availability. In addition, they protect in particular sensitive devices against dust and dirt, and generally protect against unauthorised removal.

Quality right down to the base

All cabinet bases are assembled with water-resistant glued. This means that damage, e.g. caused by room cleaning, is minimised.

Allows for floor unevenness.

Elabo cabinets can be levelled quickly and easily: adjustments or modifications to the floor part can be undertaken using a screw-driver, even if the plinth has already been mounted.

Flexibility when moving the office

Clear advantage of all Elabo cabinets: The cabinet can be disassembled without difficulty when moving to new premises or simply moving within the present ones.

Material

Unit, doors and drawer panels are made of 19 mm thick multi-layer chipboard, which is coated with melamine resin to prevent glare. This makes it scratch-resistant and also resistant to acids and lyes. Standard version in the colour light grey. Optional furniture surfaces: maple, beech

All Elabo cabinet systems can be supplied in an ESD version acc. IEC 61340-5-1.

Avoiding injury

All of the cut edges are provided with a 2 mm thick, impact-resistant edge band. Furthermore, all of the locks at body height are equipped with a hinged key.

Locking system

Easy locking is possible via automatic closing hinges and a 3-bar all-metal rotary bar. The locking cylinders are integrated replaceably into the locking handles and can be opened with a master key. In addition, optional master locking systems or radio technology can be used.

Wide opening angle

The opening angle of the cabinet and side cabinet folding doors reaches out up to 270°. This means that the opened door does not protrude into the room. The large opening angle also prevents the hinges from breaking out.

Dust-free storage

A circumferential sealing profile allows each cabinet to be closed quietly and kept dust-free.

Cost-saving mounted parts

The cabinet elements for the tall cabinets are available as base and mounting units. For cabinet combinations, costs are not only saved through the use of mounting elements, but this produces compactly-connected, uniform cabinet fronts - with substantially improved joint alignment.

Projecting upwards

Rack elements for room-height designs are also available for tall cabinets. Ladder frames and moving ladders allow easy access to the upper cabinet area.

Glass doors

Cabinet doors for tall cabinets are available from Elabo glazed to their full height. This makes the cabinet completely transparent, apart from a small section, hidden by the locking mechanism. This means that you can tell at a glance whether all objects are in their right place.

The glass doors are made of 4 mm ESG glass (single-pane safety glass).

Partition function and information wall

By doubling the cabinet rear walls, Elabo cabinet systems allow use of alternate sides with this expedient partition function. The rear walls can, for example, be used as an information area with pinboards or a steel plate board. Alternatively, cabinet doors can also be designed with a ferromagnetic pad and therefore be used as pinboards.

This is also the case for Elabo side cabinets.

The Elabo cabinet system product range includes extensive tall cabinet and side cabinet elements for use in laboratory and office. Clear, restrained design of the construction and the surfaces for the mixed utilization as laboratory and office furnishings often required in everyday practice. Overview and order through a multitude of different furnishings such as shelves, drawers and hanging file systems.

The inner life of the cabinets also reveals the practical competence of Elabo. They are conceived in such a way that order practically establishes itself in the handling of the elements. Furthermore, the high-quality materials and the excellent handling also ensure a long service life here as well – even with daily utilisation.

32 mm grid for retrofitting

The fastening of the shelves is based on a 32 mm grid division. As a result of the European fitting grid, not only shelves but also drawers, hanging files or pullout shelves can all be installed at any time later.

Robust shelf-locking system

All-metal shelf brackets with retaining lugs fix the shelf and prevent them being inadvertently pulled out when removing devices.

Metal ball bearing guide

Elabo steel plate drawers generally run on metal ball bearing guides. Noise damping during use and increased load capacity are good reasons to provide this solution.

Optimum organisation

The exceptionally diverse spectrum of organisation elements (drawers and cabinet dividers, grooved mats etc.) support highly differentiated, clear organisation in all storage containers. For example, compartment dividers or complete storage trays can be inserted into the drawers. This means that order is retained in the drawers even if they are forcefully closed.

At the same time, the structural organisation elements achieve optimum utilisation of the storage space.

Training solutions

A large selection of solutions especially for training purposes can be found in our training catalogue.

The construction of entire walls of cabinets is achieved through the use of a single base element – and depending on the desired overall cabinet width – and through the stringing together of several attachment elements. Cabinet doors with glazing in the entire height of the doors is available for professional room furnishings. The rotary bar closing mechanism is covered thereby with a light grey panel made of coated chipboard. The glass doors are made of 4 mm ESG glass (single-pane safety glass).

			Dimensions in mm	

The complete cabinets are already provided with furnishing elements. The integrated organisation aids can be modified or supplemented at any time as a result of the 32 mm European fitting grid. Sliding door cabinets require no open space for opening. In the event of space restrictions in narrow room layouts, this can be an advantage over the folding door version.

With shelves		<p>Technical data</p> <ul style="list-style-type: none"> 2 folding doors 1 handle with lock 5 height-adjustable shelves <p>Also available with radio technology (closure via transponder)</p>	<p>Width Depth Height</p> <p>1020 x 600 x 2045</p>	<p>Order no.</p> <p>07-1V</p>

Extra-wide standing space with ribbed plastic pad. All-round impact protection, base part with rubber edging. Colour: white/black	Bottom 450 At top 290 x 420	07-9Q
			Dimensions in mm	

The ladder frame is an expedient supplement to the room-height cabinet wall system. The rack elements can be easily and comfortably reached using the hanging or fixed-mounted light metal ladder. Locking systems (available from Elabo at no extra charge) have to be designed precisely according to the customer's requirements. Elabo lock cylinders fulfil these requirements. We would be happy to advise you.

Cabinet wall ladder

Technical data	Width	Depth	Length	Order no.
The guide pipe for ladder guidance is mounted between the basic and the rack cabinets onto an additional intermediate cabinet panel.	160	x 65	x 1000	07-9KZ
7-level light metal ladder, secured against removal, TÜV (Technical Inspectorate) tested, secure standing due to roller stops.	400x	87	x2230	07-9M
8-level light metal ladder, removable, suitable for hanging into a ladder guide but without rollers.	400	x 87	x 2230	07-9N
Z = Please specify length	Dimensions in mm			

Master key

Technical data	Order no.
Locking with closing bar for rack elements	07-9D
Main key for shared locker system (tall cabinets, base cabinets, side cabinets), lock cylinders can be replaced	07-9C

Locking systems

Example

Steel plate drawers for side and tall cabinets have the same construction design as base cabinets and can also be equipped with partitions and compartment dividers. In the case of wide steel plate drawers, an additional set of perforated grid strips is required. Moulded trays can also be used.

Steel plate drawer
With panel
Internal dimensions: D = 490,
W = 327
For side cabinets, width 420

Wide steel plate drawer
With panel
Internal dimensions: D = 490,

	Inside width 890 mm	889 x	4 x	84	07-7G
	Inside width 1090 mm	1089 x	4 x	84	07-7H
	Required for the use of parti- tions and compartment divi- ders in wide drawers.	Dimensions in mm			

The side cabinet system partition is identical in construction, quality and colour with the laboratory tall cabinet system. Open shelves, folding doors, shutter doors and sliding door cabinets are available. Side cabinets for storing DIN A4 hanging bags are available as well as designs with steel plate drawers. The front panels have a sturdy, ergonomic bracket handle.

Side cabinets with sliding doors have a pressure safety lock. The cabinets with drawers have a central lock with mutual door locking. All locks are adaptable for locking systems and master keys. With the accessory elements of base, storage tray and cover plate, the base cabinets can be connected together in many different ways to form larger functional units.

Side cabinets placed on top of each other – with optional integrated storage tray – can be used for the configuration of simple partition solutions – also for use on alternating sides. The free cabinet rear walls can also be used as an information area with a pinboard or a steel rear wall for writing on.

Laboratory side cabinets available in 3 widths and in 2 heights (file heights). The depth is a uniform 600 mm, just as with the tall cabinets. The drawer cabinets have steel plate drawers with perforations and the same arrangement system as is to be generally found with the Elabo base cabinet or tall cabinet drawers. The shelves are height-adjustable in 32 mm grids.

Partition elements

On the office systems, the grid widths and the drawer depths (lower file depth) are different than on the laboratory cabinet systems.

The technical design of the office cabinet system is however identical to that of the laboratory cabinet system. The laboratory and office cabinet systems can easily be combined with each other by using the same fittings, materials and surfaces.

Basic and mounting cabinet elements, corner elements and rack elements are also available.

Cabinet walls adapted to the millimetre are also part of the Elabo range.

Additional equipment for office cabinets with rack elements such as ladder frames, aluminium ladders or step stools can be used which are of the same construction as the laboratory cabinet system products.

These cabinets are additionally supply with aluminium profiles in the front and back which are powder coated in the desired colour variants. This results in a harmonious room appearance with the InForm system tables and InForm racks. The profiles can also be used for fastening accessories, e.g. lamps.

Tall cabinet		Technical data	Width Depth Height	Order no.

The steel plate drawers used in the office cabinet system are technically of the same construction as the laboratory system. The consistent organisation system also ensures optimum tidiness here - whether for base cabinets, side cabinets or tall cabinet drawers. If partitions and compartment dividers are used in the wide drawer, 1 set of perforated grid strips are required per drawer.

The office cabinets are built in the same way as the laboratory side cabinets.

The width grid and the depths of the office side cabinet program match the office tall cabinet system. Partition functions of very different kinds can be designed as with the laboratory designs. The consistency of design, function and flexibility is recognisable in all Elabo furnishing modules.

The shelves are height-adjustable within a 32 mm grid.

These cabinets are additionally supply with aluminium profiles in the front and back which are powder coated in the desired colour variants. This results in a harmonious room appearance with the InForm system tables and InForm racks. The profiles can also be used for fastening accessories, e.g. lamps.

Dimensions in mm

These cabinets are additionally supply with aluminium profiles in the front and back which are powder coated in the desired colour variants. This results in a harmonious room appearance with the InForm system tables and InForm racks. The profiles can also be used for fastening accessories, e.g. lamps.

The rear walls on the partitions can be used for internal information purposes in the same way as in the laboratory area. Mounting a pinboard or a steel plate surface for writing on provides an expedient method of communication. Pinboard design and powder coated steel plate in white. Simple installation using double-sided tape.
